# Transforming How The World Builds Software

## Pivotal accelerates the transition to a software-driven company.

For organizations that want to build great software, Pivotal bridges the Silicon Valley state of mind, modern approach, and infrastructure with a business's core expertise and value. Pivotal теams with companies to drive technology innovation, market disruption, and industry transformation. The Pivotal approach is modern, iterative, and collaborative—empowering others to move at start-up speed.

## Our modern approach to building great software.

### Reap the Benefits of a Cloud Native Enterprise

Build great software, not data centers. Focus on applications and APIs, not infrastructure. Avoid lock-in. Open and cloud native, the **Pivotal Cloud Foundry** platform accelerates application delivery and increases business agility.

### Embrace Constant Innovation and Optimize for Change

Accelerate digital transformation. Manage, analyze, and connect data with applications. **Pivotal Big Data Suite** technologies, including scale-out, open source database software, deliver the insights businesses need to respond in real time.

### Focus on Building— Not Buying—Better Software

Grow an internal, collaborative development team. Work iteratively and deliver with start-up speed. With methods that are evolutionary, agile, and lean in practice, **Pivotal Labs** practices empower teams to build new and better solutions, faster.
